SUMMARY

- **Full Stack Developer and Software Developer** with **3+ years** of professional experience designing, building, and supporting scalable web applications across enterprise platforms, healthcare systems, and e-commerce solutions, with a strong backend foundation in **Java, Spring Boot, C#, ASP.NET Core, PHP, Laravel, and Node.js**, and modern frontend expertise in **React and TypeScript**.
- Proven experience developing scalable backend services and **microservices, REST, SOAP, and GraphQL** APIs, and end-to-end **systems integration** supporting high-traffic, multi-tenant applications with real-time business workflows, payment processing, inventory management, **LLM-powered AI agent** integrations, and event-driven **automation** across web and mobile platforms.
- Strong frontend engineering background building responsive web applications using **React, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, and Tailwind**, combined with solid database design and optimization experience across **MySQL, PostgreSQL, SQL Server, and MongoDB**, with a focus on **system design**, performance, and clean component-based architecture.
- Hands-on experience deploying and maintaining production systems on **AWS public cloud** and **Azure**, working with **EC2, S3, RDS, IAM, and Azure App Services** on **Linux-based** infrastructure, building **DevOps** CI/CD pipelines using **GitHub Actions, AWS CodePipeline, and Azure DevOps**, with **unit testing** gates and **HIPAA-aligned system security** practices.
- Experienced working in **Agile**, cross-functional teams, collaborating through **code reviews, pair programming, and version control** using **Git, GitHub, and Bitbucket**, with strong practices in **bug tracking, Bash** scripting, and delivering full **software development life cycle** features using **Jira, ClickUp, Postman, and ServiceNow**.

SKILLS

Programming Languages: Java, C#, Python, PHP, JavaScript, TypeScript, SQL, Bash, HTML5, CSS3, JSON, XML

Frontend: React, Angular, Redux, Next.js, Vue.js, jQuery, Bootstrap, Tailwind CSS, D3.js, Ajax, i18n (Internationalization)

Backend & APIs: Spring Boot, Spring MVC, ASP.NET Core, Entity Framework Core, Laravel, Node.js, Express.js, REST, SOAP, GraphQL, Hibernate, Flask, Django, OAuth 2.0, JWT

Databases: PostgreSQL, MySQL, SQL Server, MongoDB

Cloud Services: AWS (EC2, S3, RDS, Lambda, IAM, CloudFormation), Azure App Services, Azure DevOps, Docker, Kubernetes, Jenkins, CI/CD

Tools & Platforms: Git, Bitbucket, GitHub, VS Code, IntelliJ IDEA, DBeaver, ServiceNow, Maven, JUnit, NUnit, Jest, Postman, DBGate, Laragon, FreshService, ClickUp, Jira, Figma, Firebase, Kafka, Redis, Putty, WinSCP

Healthcare & Standards: HL7, FHIR, HIPAA Compliance, ASP.NET Identity, Role-Based Access Control

DevOps & Practices: DevOps, CI/CD Pipelines, Unit Testing, Code Review, Pair Programming, Version Control, Bug Tracking, System Design, Systems Integration, Automation, Agile, Scrum, Event Driven Architecture, API Gateway, OOP, Design Patterns, SOLID Principles

AI Tools: LLM, AI Agents, ChatGPT, GitHub Copilot, Claude Sonnet, Prompt Engineering, Generative AI

Soft Skills: Problem Solving, Team Leadership, Cross-functional Collaboration, Communication, Mentoring

EXPERIENCE

TOGA TECHNOLOGY (AGILANT SOLUTIONS INC.), ILLINOIS | FULL STACK DEVELOPER

MARCH 2025 - PRESENT

TOGa Platforms (*Retail, Desk, View, IQ, Commerce, Supply, Hub*)

- Designed and implemented **persona-based access control** for **TOGa Commerce** using **React, TypeScript, PHP, and Node.js**, building role-driven UI flows that dynamically control feature visibility, workflows, and data access across **8+ roles** and **20+ personas**, backed by **MySQL** schema design and **multi-tenant architecture** serving **85,000+ users**.
- Implemented backend integrations for Talos, an internal **LLM-powered AI agent**, with TOGa Desk and TOGa View, enabling automated ticket creation, real time updates, and programmatic resolution, reducing manual contact center effort by **30%** and improving response times.
- Contributed to scaling **React frontend and backend services** for **TOGa Commerce**, optimizing order placement kits, persona-based flows, and tracking workflows for a platform used by **85,000+ users, improving overall application responsiveness by 20%**.
- Developed and maintained end-to-end **systems integration** between Freshservice and TOGa Desk using **REST, SOAP, and GraphQL** APIs, enabling ticket processing during off-hours through webhook-driven, event-based **automation** workflows.
- Led feature development and enhancements across **TOGa** platforms following **Agile** and **Scrum** methodologies, providing **team leadership** and **mentoring** junior developers, enhancing multi-vendor workflows and ensuring smooth post-release production stabilization.

- Implemented client-specific UI logic for **7+ client onboardings** in **TOGa View** using a multi-tenant architecture, enabling configurable layouts, workflows, and data visibility.
- Designed and optimized **MySQL database schemas** with proper foreign key relationships, and integrated **NetSuite order workflows** using background workers and scripts to improve data consistency and synchronization reliability.
- Built and enhanced **React + TypeScript** UI components, applying lazy loading, component reusability, and conditional rendering to improve **web performance optimization**, reduce initial load time, and support **cross-browser development** across scalable frontend systems.
- Built a **multi-language switcher** for **TOGa Commerce** using **React** and **i18n**, enabling dynamic switching across **5 languages** for a diverse user base, improving accessibility and user experience, while optimizing component structure for **cross-browser** and **cross-device** compatibility, managing state effectively, and ensuring smooth integration between **React** UI and **backend APIs**.
- Designed and implemented **20+ automated client reports** using background workers and **cron schedules**, generating scheduled email reports for multiple clients to track service progress, operational metrics, and ongoing activities.
- Actively supported production systems through **Bash** scripting and log analysis on **Linux** EC2 instances, backend fixes, database debugging, and API validation using **Postman**, demonstrated strong **problem solving** and **communication** skills during incident resolution, conducted **code reviews** and **pair programming** sessions, managed **bug tracking** and sprint work using **ClickUp** and **Jira**, and maintained **version control** through **GitHub**, reducing incident resolution time by **35%**.
- Deployed and supported applications across **AWS public cloud** IT infrastructure, working with **EC2**, **S3**, **RDS**, and **IAM**, and maintaining **DevOps** CI/CD pipelines using **GitHub Actions** and **AWS CodePipeline** with **unit testing** gates to ensure reliable and scalable software releases.

DOCUBYTE SOFTWARE SOLUTIONS, INDIA | SOFTWARE DEVELOPER

JUNE 2020 - AUGUST 2022

- Contributed to **MedPlusMart**, India's largest e-pharmacy serving **350,000+ daily customers**, as a **Full Stack Developer** collaborating **cross-functionally** with product, QA, and DevOps teams to build and maintain backend **microservices** in **Java**, **Spring Boot**, and **C# ASP.NET Core** powering prescription management, order processing, diagnostics booking, and rewards redemption workflows across web and mobile platforms.
- Developed and enhanced **REST** and **SOAP** APIs in **ASP.NET Core** using the **.NET SDK** with **Entity Framework Core** and **SQL Server** for core pharmacy workflows including prescription upload and verification, click-and-pick order management, home delivery scheduling, and pharmacist authorization flows, with admin-facing dashboards built using **Angular** and **TypeScript**.
- Built **HL7/FHIR**-compliant health record APIs in **Spring Boot** enabling **80,000+ patients** to store and retrieve prescription history, medical records, and diagnostic test results through **MedPlusMart's** patient portal built with **Vue.js**, ensuring interoperability with lab and diagnostic partners.
- Implemented **HIPAA**-aligned system security practices across **Java** and **C#** services including audit logging, role-based access control using **ASP.NET Identity**, field-level encryption for prescription and patient data, and secure API authentication and authorization using **OAuth 2.0** and **JWT**-based token validation.
- Designed and optimized **SQL Server** and **PostgreSQL** schemas supporting high-volume transactional data for **1,500+ pharmacy stores**, including inventory synchronization, order tracking, billing workflows, and **MedPlus Payback Points** rewards processing with real-time balance updates.
- Deployed and maintained healthcare microservices on **Azure App Services**, building **Azure DevOps CI/CD pipelines** with **Bitbucket** across **6 environments** (Alpha, Beta, Gamma, Production, Client Sandbox, Dev Sandbox) for automated builds and multi-environment releases, ensuring platform reliability for a high-traffic e-pharmacy serving **300+ cities** across India.

PROJECTS

Watch Wave - Built a full stack **React** and **JavaScript** streaming web application integrating **OpenAI API** for AI-powered recommendations, **Firestore** for authentication and real-time data, **Redux** for state management, and **TMDB API** for content discovery, delivering a seamless user experience.

E-Wallet Express - Designed and developed a **microservices**-based e-wallet application using **Java**, **Spring Boot**, **Kafka** for event-driven messaging, **Redis** for caching, and **Docker** for containerization, implementing secure authentication, transaction management, and scalable architecture.

EDUCATION

Rowan University <i>Master of Science in Computer Science</i>	GPA: 3.63/4.0 Courses: Advanced Design & Algorithms, Advanced Database, Network Security, Functional programming	SEPTEMBER 2022 - MAY 2024
Institute Of Aeronautical Engineering <i>Bachelor in computer science and engineering</i>	GPA: 3.23/4.0 Courses: Data Structures, E-Commerce, Web Technologies, Cloud Application Development	AUGUST 2018 - MAY 2022
